MARKING SYSTEM

HTM-SQX-300M-S-NC-S Printer
High Performance Thermal Printer

Highlights

- Colour Touch Screen Navigation Panel
- Robust housing
- Memorycard for standalone use (non PC reliant)
- Ideal for printing on cable labels
- Mid-centered automatic print positioning
- Ethernet & WiFi as standard for network printing

A robust range of universal thermal thermal transfer printers manufactured for industrial applications and offering excellent print definition and mark permanence. Designed to work in high volume environmentswhether standalone or as part of a 'print and apply' application. This printer is suitable for awide range of media including heatshrink sleeves (both ladder and continuous format), high specificationtie-on cable labels, adhesive panel labels, as well as self laminating labels and polyester labels.

Squix range of printers work best with our market leading SumiLabel Software which is optimised for harness building, cable and asset marking.
